FULL STACK DEVELOPER

I am a tech enthusiast with a foundation in fashion design, combining creativity with technical expertise. I have built a strong foundation in Full Stack MERN development (MongoDB, Express.js, React.js, Node.js), enabling me to create dynamic, scalable web applications. As a self-taught developer, I continuously seek out new learning opportunities and have independently acquired proficiency in various technologies, tools, and frameworks. This self-driven approach to learning has helped me stay ahead in an ever-evolving tech landscape. My diverse background allows me to approach challenges with a fresh perspective, making me highly adaptable and capable of delivering innovative solutions across both front-end and back-end development.

SKILLS

TECHNICAL SKILLS

- JavaScript
- React
- Node.js
- Express.js
- MongoDB
- HTML5
- CSS3
- Git
- Bootstrap
- Figma
- Photoshop
- Illustrator
- Excel
- Gen AI

PROFESSIONAL SKILLS

- Problem-Solving
- Team Collaboration
- Communication
- Adaptability
- Time Management
- Attention to Detail
- Critical Thinking
- Creative Thinking
- Customer Focus
- Leadership & Mentorship
- Conflict Resolution

EDUCATION

2016

VIDYA VIHAR SCHOOL

Thrissur, Kerala, India

CBSE

2017 - 2019

NATIONAL SCHOOL

Thrissur, Kerala, India

Secondary education

2020 - 2023

SHREE DEVI COLLEGE

Mangalore, Karnataka, India

Bachelor in Fashion design

PROJECTS

SCALNOVA

Developed a dynamic, high-performance website for Scalnova, a cutting-edge web design and development company. Focused on delivering scalable, creative, and innovative solutions tailored to businesses of all sizes. Led the project from concept to completion, ensuring a seamless user experience and optimized performance across all devices.

NETFLIX CLONE

Developed a Netflix-inspired web application using React to replicate the functionality of an existing platform. Integrated the TMDB API to fetch and display dynamic movie and TV show data, including categories, trending content, and detailed information. The project helped me gain hands-on experience with React components, API integration, and responsive UI design, closely mimicking real-world application behavior

SHOPPING CART

Developed a robust e-commerce platform designed to provide seamless online shopping experiences. The website allows users to browse, select, and purchase a wide range of products with ease. Integrated features such as product search, filtering options, and secure payment gateways, ensuring a user-friendly and secure shopping environment. The platform also supports features like order tracking, customer reviews, and personalized recommendations, enhancing user engagement. This project showcases my ability to build scalable, responsive e-commerce solutions tailored to meet both user needs and business objectives.

MODELING AGENCY

Developed a web application for a modeling agency with the concept of 'where talent meets opportunity.' The platform connects models with companies seeking to showcase their products, offering a variety of model profiles for selection. Built features to allow companies to easily browse and choose models that align with their brand image. Additionally, the application provides struggling talents with a platform to market themselves effectively. This project highlights my ability to create user-centric solutions and handle dynamic requirements in web development.
